Three Ways to Reach Your Goals with Spee-Dee in 2018

Do you need an affordable way to integrate accurate weight verification into your filling line? The Evolution checkweigher seamlessly interfaces with filling systems and machines. Magnetic Force Restoration (MFR) Technology in the load cell guarantees precise and reliable weight

measurement. The nonproprietary controls are PLC-based, so it's easy to calibrate in the field and interface with other plant communication systems. The three-leg base is easy to level, and all components and cables are found inside the rails of the frame.

Do you need a high-speed cup filler that can be integrated easily into an automatic line? The newest Spee-Dee cup filler has a new design for fast and accurate filling, a new easy-access base, and a new bottom plate for faster changeovers.

Do you need a competitively priced filler for your dry food, beverage, pharmaceutical or chemical application? The Revolution powder filler delivers fast fills with less maintenance thanks to its servo motor auger control and direct drive design. You get a full-color touch screen operator interface, PLC based controls and non-proprietary electrical components. It supports a 5g to 5 lb. fill range and reaches up to 120 fills/minute.

Spee-Dee is dedicated to creating the safest and most efficient packaging line possible. That commitment will be on display at PACK EXPO East in Philadelphia, April 16-18. **Visit us at Booth 1615** to see how we can help you solve your filling challenges. **You can register for PACK EXPO East for FREE by using our personalized comp code: 27T78**

KEEP UP WITH TECHNICAL ADVANCES AND CHANGING SAFETY STANDARDS FOR YOUR FOOD APPLICATION

There is a big advantage to smaller shows like PACK EXPO East. It gives us the chance to spend more personal time with individual customers to have one-on-one conversations to

learn more about the unique challenges they face in their daily operations.

As we move into 2018, producers are still facing challenges brought on by enhanced food safety measures and changing consumer demands. Spee-Dee has the know-how and the manpower to help you find the specific solution to your food safety challenge or production dilemma.

Customer-focused innovation is central to Spee-Dee's long-term business strategy. At our booth, we create an atmosphere of meaningful attendee learning. We can provide you with the product and industry information you need to help maintain first-class quality and meet your production goals.

If you have a current project and you're trying to lay the groundwork with a new vendor... or you just want to discover what new technologies are available, **visit booth 1615 at PACK EXPO East.** Talk with a Spee-Dee representative to see how we can help you improve the speed, efficiency and safety of your new machine or an existing line.
